

## INDIAN INSTITUTE OF TECHNOLOGY ROORKEE

**NAME OF DEPARTMENT/CENTRE:** International Centre for DAMS

1. **Subject Code:** DS-501      **Course Title:** Assessing and Managing Risks Associated with Dams
2. **Contact Hours:**                      **L:** 3                                      **T:** 1                                      **P:** 0
3. **Examination Duration (Hrs.):**              **Theory:** 3                                      **Practical:** 0
4. **Relative Weightage:**    **CWS:** 20-35      **PRS:** 0      **MTE:** 20-30      **ETE:** 40-50      **PRE:** 0
5. **Credits:** 4                                      **6. Semester:** Both                                      **7. Subject Area:** PEC
8. **Pre-requisite:** Nil
9. **Objective:** To provide necessary background about the various risk associated with dams and the techniques for dam safety assessment and management.

### 10. Details of the Course

S.No.	Contents	Contact hours
1.	<b>Overview of Dams Risk Assessment and Management:</b> Smart Governance and risk management, Risk analysis Formal Framework, Risk-informed decision-making and its importance in an integral Dam Safety Management Program, Dam Safety Program Fundamentals in USA, Spain, Argentina, Brazil etc.	4
2.	<b>Basis for a Risk-Informed Dam Safety Management Program for India:</b> Dam failure risks worldwide, Dam failure risks in India, Lessons learnt from Risk Assessment and Management worldwide.	6
3.	<b>Initial Risk-Based Screening:</b> Purpose of a risk-based screening tool, elements of the risk-based screening tool, brief reference to the Hazard Classification in India, dam safety inspections reports and DHARMA. Practical workshop or hands-on exercise.	5
4.	<b>Identification of Failure Modes:</b> PFMA (Potential Failure Mode Analysis), types of failure modes and loading scenarios, the purpose of the failure mode identification, Identification and classification of Failure Modes, Identification of investigation and surveillance needs, Proposal of risk reduction actions. Practical workshop or hands-on exercise.	5
5.	<b>Semi-Quantitative Risk Analysis:</b> Introduction, scope, and limitations of a semi-quantitative risk analysis (Failure probability categories Vs. Consequences categories), Prioritization of new studies or instrumentation. Practical workshop or hands-on exercise.	4
6.	<b>Quantitative Risk Assessment:</b> Introduction, scope and limitations. Incremental Risk Concept, Failure modes structure, Risk model input data, Levels of Detail in Risk Calculation input data, Event tree concept and calculation examples, Common Cause Adjustment, Risk Calculation in dam systems, Risk Representation (FN and FD Graphs). Uncertainty analysis in risk calculations. Practical workshop or hands-on exercise.	6
7.	<b>Risk Evaluation (Quantitative Risk Assessment):</b> Introduction, scope and limitations on Risk Evaluation process. Tolerability Guidelines Worldwide (ANCOLD, USBR, USACE, other countries/agencies), Proposal and justification of Tolerability Guidelines for India, Definition and prioritization	5

	of risk reduction actions, Risk reduction principles, Relation between quantitative risk models and DRIP Guidelines. Practical workshop or hands-on exercise.	
8.	<b>Portfolio Risk Management:</b> Introduction, Risk-informed decision-making inputs, risk-informed decision-making process (conditioning aspects). Structure of Reports on Dam Safety Risk Assessment. Practical workshop or hands-on exercise.	3
9.	<b>Risk Governance:</b> Introduction, Capacity building, Risk Communication, Overall Regulatory Framework, Review and quality assurance, Other Factors Affecting Decision Making- Climate Change, Inter-State Issues etc. <b>Institutional Framework in Dam Safety:</b> Perspective of Institutional framework in Switzerland, USA, Australia; Existing Dam Safety Monitoring Mechanism in India-Dam Safety Organization (DSO), National Committee on Dam Safety (NCDS), National Committee on Seismic Design Parameters (NCSDP); Dam Safety Legislation in India-Historical Development, Important Provisions of the Dam Safety Bill 2019.	4
<b>Total</b>		<b>42</b>

3.	Raftery J., Loosemore M. and Reilly C., “Risk Management in Projects”, United Kingdom: Taylor & Francis	2006
4.	Rodríguez Valladares M., “Overview of Credit Risk Portfolio Management”, (n.p.): FT Press Delivers	2011
5.	“Risk Analysis, Dam Safety, Dam Security and Critical Infrastructure Management”. Netherlands: CRC Press	2011
6.	Solozhentsev E., “Risk Management Technologies: With Logic and Probabilistic Models”, Netherlands: Springer Netherlands	2012
7.	“Hydrology of Disasters”, Netherlands: Springer Netherlands	2012
8.	Iverson D., “Strategic Risk Management: A Practical Guide to Portfolio Risk Management”, Germany: Wiley	2013
9.	Wagner R., “The Handbook of Project Portfolio Management”, United Kingdom: Taylor & Francis	2018
10.	“Guidelines Assessing and Managing Risks Associated with Dams”, DRIP, DoWR, MoJ, GoI, New Delhi	2019

**INDIAN INSTITUTE OF TECHNOLOGY ROORKEEWE3232**

NAME OF DEPTT. /CENTRE: **INTERNATIONAL CENTRE FOR DAMS**

1. Subject Code: **DS-502** Course Title: **Basics of Disaster Management and its implementation Concepts**
2. Contact Hours: **L: 3 T: 1 P: 0**
3. Examination Duration (Hrs): **Theory: 3 Practical: 0**
4. Relative Weightage: **CWS: 20-35 PRS: 0 MTE: 20-30 ETE: 40-50 PRE: 0**
5. Credits: **4** 6. Semester: **Autumn**
7. Subject Area: **PCC** 8. Pre-requisite: **NIL**
9. Objective: To provide the basics of disaster management and implementation of various concepts to the dam by various modelling and mapping etc.
10. Details of Course:

S. No.	Contents	Contact Hours
1	<b>Overview of Disaster Management and Flood Mapping:</b> Disaster management cycle, Disaster Management Policies in India. Potential Uses of Flood Mapping in brief, Tiered Flood Modelling and Mapping Approach in India.	4
2	<b>Flood Risk Associated with Dams:</b> Types of Dams, Dam Failure concept, Estimation of consequences.	8
3	<b>Disaster Mitigation:</b> Warning and evacuation, do's and don'ts about disaster, damage survey for designing aid package, detailed survey for reconstruction, repair and retrofitting, post disaster survey, long term measures, codal practices.	5
4	<b>Remote Sensing and Geographic Information Systems (GIS) applied to Emergency Preparedness and flood Mapping:</b> Techniques, uses, importance, Planning the Mapping Process, Geographical Information System (GIS), GIS Software, Practical workshop or hands-on exercises	5
5	<b>Dam Hazard Classification Framework in India:</b> CWC Guidelines; Assessment of the Area Affected by Dam break; Failure Scenarios, Classification of the Dams in India Based on Hazard Potential; Potential	4

	Consequences Index Definition and Calculation Process (Additive-weighting scheme), Potential Implications of Hazard Potential Classification; Requirement for Emergency Action Plans (EAP) and their revision. Practical workshop or hands-on exercises.	
6	<b>Emergency Action Plans Preparation:</b> Emergency management Organisation (Stakeholders), Relationship of the EAP document and the O&M manual. Establishment of emergency response protocols/procedures, Notification Flowcharts, levels of alerts and associated thresholds, preparedness actions/protocols, local evacuation plan [shelters, evacuation routes, warning time], communications networks, emergency resources and equipment. Practical workshop or hands-on exercises.	8
7	<b>Emergency Action Plans Implementation:</b> Stakeholder's Consultation Meeting (discussion-based exercise), mock-drill or table top exercise for EAP testing and improvement. Design of an incident management system, types, and design process of a warning system network in the flood plain. Integration of the Dam EAP with the District/State Disaster Management Plan. Practical workshop or hands-on exercises.	5
8	<b>Environmental Management:</b> Introduction; Existing Policies and Legal Framework; Procedure for Environment, Forest and Wildlife Clearances; EIA Procedure; Environmental Management and Control; External Funding Agency's Policy and Requirements on Environmental and Social Safeguards	3
Total		42

NAME OF DEPTT. /CENTRE: **INTERNATIONAL CENTRE FOR DAMS**

1. Subject Code: **DS-503** Course Title: **Hydrologic Safety Evaluation of Dams**
2. Contact Hours: **L: 3 T: 1 P: 0**
3. Examination Duration (Hrs): **Theory: 3 Practical: 0**
4. Relative Weightage: **CWS: 20-35 PRS: 0 MTE: 20-30 ETE: 40-50 PRE: 0**
5. Credits: **4** 6. Semester: **Autumn**
7. Subject Area: **PCC** 8. Pre-requisite: **Nil**
9. Objective: To provide the knowledge and aspects of Hydrologic Evaluations for dam safety.
10. Details of Course:

S. No.	Contents	Contact Hours
1	<b>Design Flood Analysis:</b> Design flood estimation by Hydro-meteorological approach: Concept of Unit hydrograph, design storm, depth estimation from PMP Atlas, clock hour correction, areal reduction factor, Storm transposition, Location Adjustment Factor (LAF), Barrier Adjustment Factor (BAF), Transposition Adjustment Factor (TAF), Moisture Maximization Factor (MMF), loss rate, base flow, time distribution coefficient, HEC-HMS model	8
2	<b>Design flood estimation by flood frequency approach:</b> Statistical tests on flood data, stationary and non-stationary flood frequency analysis, computation of return period floods, Goodness of fit tests	8
3	<b>Channel routing:</b> Hydrological and hydraulic channel routing	4
4	<b>Reservoir routing:</b> Modified Pul's and other applicable methods	3
5	<b>Dam Breach Modelling:</b> Parameters estimation methodologies, Breach outflow routing (Upstream Flood Routing methodologies, Downstream Flood Routing methodologies, two-dimensional depth averaged models, one-dimensional models and coupled 2D-1D models, Modelling Software available), Practical workshop or hands-on exercises for three different levels of detail in dam breach modelling (Tier I, II and III)	8
6	<b>Reservoir Rule Curve:</b> Consistency check of inflow data, computation of percentile and dependable flow, derivation of rule curve, conservation rule	5

	curve, upper rule curve, testing of rule curve for different dependable flows	
7	<b>Hydrological safety under changing climate:</b> Climate change, Changes in precipitation domain and its impact of inflows.	6
Total		42

NAME OF DEPTT. /CENTRE: **INTERNATIONAL CENTRE FOR DAMS**

1. Subject Code: **DS-511** Course Title: **Seepage through Dams**
2. Contact Hours: **L: 3 T: 1 P: 0**
3. Examination Duration (Hrs): **Theory: 3 Practical: 0**
4. Relative Weightage: **CWS: 20-35 PRS: 0 MTE: 20-30 ETE: 40-50 PRE: 0**
5. Credits: **4** 6. Semester: **Both**
7. Subject Area: **PEC** 8. Pre-requisite: **NIL**
9. Objective: To develop the understanding of basic principles and concepts of Seepage and its control in Dams.
10. Details of Course:

S. No.	Contents	Contact Hours
1	Importance of seepage in dam safely and rehabilitation, Types and causes of seepage through various types of Dams	4
2	Fundamentals of seepage through porous media, Darcy's law, seepage velocity, Dupuits theory, Seepage charts, Phreatic lines, Flow nets, Determination of free surface and seepage discharge through dams for isotropic and anisotropic media. Flow net for earth dam under steady/transient seepage condition, the stability of dams	10
3	Seepage Analysis, Boundary conditions, numerical techniques and modelling tools, Phreatic line with and without filter, stability conditions	5
4	Seepage through main body of various types of dams; Measurement of seepage water in galleries, Various methods of seepage control, Selection of core materials, Drainage of embankments, Design criteria of filters, Use of geo-textiles, Seepage Control through Embankments, Foundations	7
5	Seepage through bottom of reservoir area; various types of geological formations in the bed; identification techniques to know the seepage from the beds, Dam Grouting, Design and installation of grout curtains	6
6	Seepage detection, control and monitoring, Plan and design of various dams and adopt suitable measures for its safety	6
7	Practical examples and site visits	4
Total		42

S. No.	Contents	Contact Hours
1	<b>Introduction:</b> Earthquakes, characteristics and distribution, tectonic features of the earth, geo-tectonic divisions of the Indian continent, geologic hazards perception. Background and lessons learnt from damages in past earthquakes.	3
2	<b>Earthquakes in Different Geological Set-Ups:</b> Geological structures and deformation pattern, inter and intra – continent set up, convergent zones, divergent margins, trenches, thrusts and faults. Earthquake implication of structural discontinuities, the impact of the neo-tectonic activity.	3
3	<b>Mapping:</b> Coordinate and coordinate systems; geographical and map projection system, 2D and 3D data transformation, types of maps, scales, map sheet numbering systems and uses, types of maps, introduction to topographical and geological maps, thematical maps, geological sections, data processing, analysis and presentation techniques.	2
4	<b>Wave Propagation:</b> Waves in semi-infinite media – one-, two- and three-dimensional wave propagation; Attenuation of stress waves – material and radiation damping; Dispersion. waves in a layered medium.	2
5	<b>Dynamic Soil Properties:</b> Stress & strain conditions, the concept of stress path; Measurement of seismic response of soil at low and high strain, using laboratory tests; Cyclic triaxial, cyclic direct simple shear, resonant column, shaking table,	4

	centrifuge and using field tests - standard penetration test, plate load test, block vibration test, SASW/MASW tests, cross borehole; Evaluation of damping and elastic coefficients; Stress-strain behaviour of cyclically loaded soils; Effect of strain level on the dynamic soil properties; Equivalent linear and cyclic nonlinear models; Static and dynamic characteristics of soils.	
6	<b>Ground Response Analysis:</b> Introduction-, one-, two- and three-dimensional analyses; Equivalent and nonlinear finite element approaches; Introduction to soil-structure interaction.	2
7	<b>Liquefaction:</b> Introduction, pore pressure, liquefaction related phenomena – flow liquefaction and cyclic mobility: Factors affecting liquefaction, liquefaction of cohesionless soils and sensitive clays, liquefaction susceptibility; State Criteria –CVR line, SSL, FLS; <b>Evaluation of liquefaction potential:</b> characterization of earthquake loading and liquefaction resistance, cyclic stress ratio, Seed and Idriss method; Effects of liquefaction.	3
8	<b>Earth Pressure:</b> Active and passive earth pressures; Terzaghi’s passive wedge theory, numerical methods, earth pressure measurements.; Seismic design of retaining walls: types, modes of failures, static pressure, seismic response (including M-O Method), seismic displacement, design considerations.	2
9	<b>Seismic Slope Stability:</b> Types of earthquake-induced landslides; Evaluation of slope stability – stability analysis with dynamic loading, friction circle method, effective and total stress methods of analysis, factor of safety, yield acceleration, damage potential, displacement analysis, effect of saturated and submerged conditions, FEM analysis of slope stability.	3
10	<b>Remote Sensing in Earthquake Geology:</b> Basic concepts of satellite imaging of ground, types of satellite data in identifying the tectonic features, recognising characteristics of earthquake deformation features, SAR interferometry for earthquake deformation studies; Application of GPS for mapping;	4
Total		28

**List of Experiments:** Processing of pre and post-earthquake satellite images, Collection of data using GPS and mapping, Use of SAR interferometry for surface displacement measurement, Liquefaction Resistance of Soil using Vibration Table, Shear Velocity Profile using MASW, N values of cohesionless soils using SPT, c and  $\Phi$  of soil using direct shear/triaxial tests, Liquefaction resistance of soil using cyclic triaxial test apparatus, Determination of dynamic properties using laboratory tests; Shear velocity profile using cross-bore test; Model Testing on Small Geotechnical Centrifuge.

2. Contact Hours:            **L: 2**                      **T: 0**                      **P: 2**
3. Examination Duration (Hrs):            **Theory: 3**            **Practical: 0**
4. Relative Weightage: **CWS: 15-30**    **PRS: 20**    **MTE:15-25**    **ETE: 30-40**    **PRE: 0**
5. Credits:            **4**    6. Semester: **Both**
7. Subject Area: **PEC**    8. Pre-requisite: **NIL**
9. Objective: To reinforce the understanding of different physical aspects of dams through the case studies and visits to major national and international dams.
10. Details of Course:

S. No.	Contents	Contact Hours
1	<b>Introduction:</b> Introduction to dams; types of dams; major dams in India and abroad; characteristics of major dams.	2
2	<b>Case studies:</b> Case studies on major dams in India and abroad, such as Tehri Dam, Hirakund Dam, Tungabhadra Dam, Bhakra Nangal Dam, Nagarjuna Sagar Dam and Krishnasagar dam	2
3	<b>Discussions on Detailed Project Report (DPRs) of major dams:</b> Introduction to DPRs; understanding the different elements of DPRs: survey & investigation, geology, hydrology, structural design, hydro-mechanical design, power generation, cost estimates, etc.; discussions on DPRs	4
4	<b>Field visits to majors dams:</b> Visits to some of the dams; visit reports; and discussions. Tehri Dam, Hirakund Dam, Tungabhadra Dam, Bhakra Nangal Dam, Nagarjuna Sagar Dam and Krisnasagar dam	2
5	<b>Expert lectures:</b> Lectures by experts from different national and international agencies/institutes on design and operations of dams.	4

6	Provision of the visit to one or cluster of the international dams following the best practices during semester breaks	-

2. Contact Hours: **L: 3 T: 1 P: 0**
3. Examination Duration (Hrs): **Theory: 3 Practical: 0**
4. Relative Weightage: **CWS: 20-35 PRS: 0 MTE: 20-30 ETE: 40-50 PRE: 0**
5. Credits: **4** 6. Semester: **Both**
7. Subject Area: **PEC** 8. Pre-requisite: **NIL**

9. Objective: This course will impart the knowledge and application of geospatial technologies in monitoring changes in geomorphological characteristics and structural changes of dams and other hydraulic structures.

10. Details of Course:

S. No.	Contents	Contact Hours
1	Overview of Geospatial Technologies	2
2	Introduction to optical remote sensing and its applications to surface water changes; Fundamentals of Digital Image Processing	4
3	Introduction to microwave (SAR) remote sensing; InSAR processing and its application to dam monitoring and associated tools/software; Structural Monitoring of Dam Structures using SAR	6
4	Introduction to UAV sensing; various components of UAV; autonomous UAVs; UAV data collection and processing methods; Indian Regulatory Systems for UAV sensing	6
5	Introduction to LiDAR; LiDAR data collection methods; Application of LiDAR technology to dam monitoring	6
6	Introduction to GPS Systems; GPS data collection techniques; Application of GPS to dam monitoring	6
7	Monitoring of Catchment Characteristics using geospatial technologies: Snow covered areas and rain-fed areas	6
8	Monitoring of landslide zones using geospatial technologies and their representation in GIS	3
9	Application of geospatial technologies for land use/cover change monitoring in flood-prone downstream areas of dams and risk assessment	3

2. Contact Hours: **L: 3 T: 1 P: 0**
3. Examination Duration (Hrs): **Theory: 3 Practical: 0**
4. Relative Weightage: **CWS: 20-35 PRS: 0 MTE: 20-30 ETE: 40-50 PRE: 0**
5. Credits: **4** 6. Semester: **Both**
7. Subject Area: **PEC** 8. Pre-requisite: **NIL**
9. Objective: To introduce the ground improvement techniques and geo-synthetics for the dam safety, repair and rehabilitation.
10. Details of Course:

S. No.	Contents	Contact Hours
1	<b>Basics:</b> Principles of ground improvement, Types/Classification of ground improvement techniques. Mechanical modification, Types of compaction techniques, Properties of compacted soil. Hydraulic modification, dewatering systems, preloading and vertical drains, electro-kinetic dewatering, chemical modification, modification by admixtures, stabilization using industrial wastes, grouting, soil reinforcement principles,	06
2	<b>Methods of stabilizations:</b> – Mechanical – Admixture (Cement/Lime) - Bituminous - Chemical. Types of admixture stabilisation- Grouting (permeation grouting, compaction grouting, jet grouting), Deep Soil Mixing, Mass Soil Stabilisation, Cutter Soil Mixing. Grouting: - basic functions- permeation-compaction-hydro fracture, classification of grouts- grout ability ratio- properties of grouts - viscosity, stability, fluidity, rigidity, thixotropy, permanence Grouting applications : - seepage control in soil and rock under dams- seepage control in soil for cut off walls – stabilization grouting for underpinning. Properties of admixture stabilised soils, Design of hydraulic cut-off walls, grout curtains.	10
3	<b>Geosynthetics:</b> Properties of geosynthetics and its testing, applications of geosynthetics in bearing capacity improvement, slope stability, retaining walls, embankments on soft soil, and pavements, filtration, drainage and seepage control with geosynthetics, geosynthetics in landfills, soil nailing and other applications of geosynthetics. improvement of ground using geomembranes,	08

	geocells, geonets, geotubes	
4	<b>Reinforced earth:</b> - Mechanism- types of reinforcing elements- reinforcement-soil interaction –applications- reinforced soil structures with vertical faces. Design of reinforced earth retaining walls, reinforced earth embankments structures	06
5	<b>Advances</b> in ground improvement technologies- thermal stabilisation, biotechnical stabilization, hydroseeding etc.	02
6	<b>Case Studies:</b> Different case studies in India and around the world in the field of Ground Improvement and Geosynthetics.	10
Total		42

1	<b>Basic Concept/ Design:</b> Classification of Dam Types, Physical Factors governing Selection of Type, General Arrangement, Area Capacity Curve, Fixation of different hydraulic Levels and Capacities	4
2	<b>Diversion Arrangement:</b> Design of Cofferdams, Design of Diversion Tunnels, Design of Diversion Channels	8
3	<b>Spillways:</b> Types of Spillways (Ogee, Sluice, Side Channel, Chute channel, Conduit and Tunnel, Morning Glory etc.), Hydraulics, Profiles and Spillway Capacity, Types of Energy Dissipation Arrangement (EDA) (Stilling Basin, Bucket type etc.), Design of EDAs	5
4	<b>Foundation Design:</b> Embankment: Treatment of foundation, Cut off trenches, Toe Drains and Pressure relief wells etc., Concrete Dam: Consolidation Grouting, Curtain Grouting etc., Other suitable foundation measures for other type of dams and barrages	5
5	<b>Stability Analysis:</b> Forces/ Loads to be considered, Different load cases, Factors of safety in different conditions, Allowable stress/ deformation conditions	4
6	<b>Design of other structures:</b> Free board calculations and conditions for different types of dams, Piers, Spillway bridges, Different Galleries, Stair Case/ Lift, Control Room, Retaining walls, Dam Toe Power House etc	8
7	Construction Methods and suitable treatments for Concrete Dams/ RCC Dams/ CFRD Dams/ Arch Dams, Earth/ Embankment Dams/ Rock fill Dams,	5

	Barrages, Specific Studies such as Thermal Analysis etc., Physical & Numerical Model Studies	
8	<b>Software analysis:</b> Different software and their detailed applications, Analysis of all the above designs using Softwares.	3

**INDIAN INSTITUTE OF TECHNOLOGY ROORKEE**

NAME OF DEPTT. /CENTRE: **INTERNATIONAL CENTRE FOR DAMS**

1. Subject Code : **DS-522**      Course Title: **Seismic Safety of Embankment Dams**
2. Contact Hours:      **L: 3**                      **T: 1**                      **P: 0**
3. Examination Duration (Hrs):      **Theory: 3**      **Practical: 0**
4. Relative Weightage: **CWS: 20-35**    **PRS: 0**    **MTE: 20-30**    **ETE: 40-50**    **PRE: 0**
5. Credits:      **4**    6. Semester: **Both**
7. Subject Area: **PEC**    8. Pre-requisite: **NIL**
9. **Objective:** To cover the issues pertaining to earth and rock-fill dams under seismic loads and their analysis using classical and contemporary approaches.
10. Details of Course:

S. No.	Contents	Contact Hours
1	<b>Introduction to Earth and Rock-fill Dams:</b> Introduction to dams; Characteristics of embankment dams; Differences between embankment dam and other types of dams; Components of embankment dam, functions and suitable materials; Zones of an embankment dam; Types of embankment dams: Homogeneous, Zoned and Diaphragm type dams; Influence of inclined and vertical core; Composite dams; Site selection for an embankment dam: Geology and seismicity of dam site, Reservoir rim and basin, Construction materials, Suitable spillway location, Submergence aspects, and Construction infrastructure;	6
2	<b>Case Studies Related to Dam Failures:</b> Performance of embankment dams in past earthquakes; Causes of dam failure: Non-Earthquake conditions, and Earthquake conditions; Different modes of dam failures; Inferences from various case studies: Teton dam, Machchhu dam failure, Hebgen dam, Los Angeles dam, San Fernando dam, and Sheffield Dam.	3
3	<b>Stability Analysis of Dams:</b> Effective and total stress methods of analysis; Analysis by Fellinius, Spencer, Bishop, Spencer method, Morgenstern price methods; Seismic slope stability methods: Inertial slope stability methods, Pseudostatic analysis, Displacement analysis; Pseudo-static analysis by Friction-circle, Fellinius and Bishop's methods; Factor of safety, yield accelerations and damage potential under saturated and submerged conditions; Displacement analysis by Newmark and Makdisi-Seed methods; Different loading cases for dam stability analysis: End of the construction, Partial submergence, Sudden drawdown, Steady state seepage, Sustained rainfall, and Earthquake; Slope protection measures	8

4	<b>FEM for Dam Analysis:</b> Application of FEM, Dam-foundation interaction; Identification of zones of hydraulic fractures and cracks; Nonlinear analysis, Tangent stiffness, Secant stiffness methods and No-tension analysis; Inertial and Weakening slope stability analysis; Modelling aspects: Element size, Domain size, Boundary conditions. Computer applications: Software to compute static & dynamic stresses induced, Deformations & displacements resulted, and Zones of liquefaction within the dam; Dynamic analysis of dams with examples;	8
5	<b>Seismic Performance Criteria for Large Embankment Dams:</b> Background; Integral dam safety concept; Seismic hazard a multi-hazard; Primary factors to consider in seismic design: Regional factors, Local factors; Selection of earthquakes for analysis; Seismic evaluation requirements; Seismic input parameters for analysis; The conceptual and constructional criteria for seismic-resistant fill dams	3
6	<b>Design Response Spectra – Generation of Time History:</b> Introduction, Standard code of practices; Synthesis of uncorrelated accelerograms: Modification of recorded accelerograms in time-domain, Modulated sum of harmon, Superposition of narrow-band time histories, Parametric time series modelling, Modification of recorded time history in frequency domain, Ground motion synthesis in frequency-domain; Spatially correlated accelerograms: Modelling of spatial variation, Method of spectral factorization, Method of principal components.	4
7	<b>Reservoir Rim and Basin Stability:</b> Causes and effects of rim stability, methods for assessing rim and basin stability: Earthquake induced landslide activity, Different types of earthquake induced landslides and their assessment methods.	3
8	<b>Assessment of Seepage Pressures:</b> Seepage in earth and rockfill dams and their foundations, Different methods of seepage assessment; Standard analytical solutions for seepage problems, Piping and Liquefaction; Estimation of pore pressure by flow net and its construction: Confined flow and Unconfined flow; FEM analysis for the estimation of seepage pressures.	4
9	<b>Guidelines for the Seismic Design and Construction of Embankment Dams:</b> Different codal provisions: Core, Shell, Cut-off wall, Cut-off Barrier, Transition Zones and Transition Filters; Internal drainage system; Protective layers for erosion control; Free board; Parapet wall; Riprap;	3
Total		42

List of Experiments:

1. Demonstration of GeoStudio
2. Stability assessment of an existing dam using SLOPE/W
3. Seismic stability assessment of an existing dam using QUAKE/W
4. Assessment of seepage pressures using SEEP/W.
5. Generation of spectrum compatible time histories.
6. Deconvolution of time histories to obtain base input motions.
7. Dynamic stability assessment of a model dam using shake table experiment.

**INDIAN INSTITUTE OF TECHNOLOGY ROORKEE**

NAME OF DEPTT. /CENTRE: **INTERNATIONAL CENTRE FOR DAMS**

1. Subject Code: **DS-524** Course Title: **Engineering Seismology and Hazard analysis of Dams**
2. Contact Hours: **L: 3 T: 1 P: 0**
3. Examination Duration (Hrs): **Theory: 3 Practical: 0**
4. Relative Weightage: **CWS: 20-35 PRS: 0 MTE: 20-30 ETE: 40-50 PRE: 0**
5. Credits: **4** 6. Semester: **Both**
7. Subject Area: **PEC** 8. Pre-requisite: **NIL**
9. Objective: To provide the concepts of engineering seismology, seismological instrumentation, reservoir induced seismicity, seismic hazard assessment.
10. Details of Course:

S. No.	Contents	Contact Hours
1	<b>Introduction:</b> Scope of seismology; Definitions of important terms; Causes of earthquakes and their classifications; Earthquake effects on ground and structures, Plate tectonics- continental drift, types and characteristics of various plate margins; Earthquake catalogue and seismicity of the earth; Major earthquakes in the world; Important Indian earthquakes	10
2	<b>Wave Propagation and Instrumentation:</b> Theory of elasticity; Body and surface waves; Local site effects; Seismic phases; Internal structure of earth; Reference models, Earthquake intensity, Earthquake magnitude, frequency magnitude relations, Earthquake recordings - principles and theory of seismograph; Real time warning system; International monitoring system (IMS); Local seismological networks, strong motion networks and their engineering importance.	8
3	<b>Seismic Hazard Assessment:</b> Definitions- seismic hazard, disaster and risk; Probabilistic and deterministic approach; Earthquake occurrence models; Seismotectonic modeling and type of sources; Estimation of maximum magnitude, maximum credible earthquake, design basis earthquake; Frequency magnitude relationship; Poissonian and Non Poissonian models; Ground motion prediction equations; Uncertainties in seismic hazard assessment and their quantification; Return periods and strong motion exceedance rates; Site-specific design earthquake parameters; Case studies.	8
4	<b>Geophysical Methods:</b> Seismic methods; Well logging; Steady state Rayleigh method; Spectral analysis of surface waves-SASW and MASW methods;	6

	Ground penetrating radar, bedrock profiling. Quantification of Site Effects: Experimental methods; Microearthquake- standard spectral ratio method & horizontal to vertical spectral ratio method; Microtremors - absolute spectra, SSR method & H/V ratio; Empirical relations; Analytical method; 1D ground response of layered medium	
5	<b>Site-specific Ground Motion Estimation:</b> Empirical Green's function; Numerical methods; Basic concept, recent developments; Domain method, boundary method & hybrid method; Effects of nonlinearity on ground motion	5
6	<b>Seismic Microzonation:</b> PSHA and DSHA; Seismic microzonation of mega cities, scales used in seismic microzonation; Recent developments and case studies.	5
